Name of Trustee Company	Zerodha Trustee Private Limited
Address	Indiquebe Penta, New No. 51 (Old No. 14), Richmond Road, Bangalore - 560 025
Website	www.zerodhafundhouse.com

This Key Information Memorandum (KIM) sets forth the information, which a prospective investor ought to know before investing. For details of the scheme/ Mutual Fund, due diligence certificate by the AMC, Key Personnel, investors' rights and services, risk factors, penalties & pending litigations, etc. investor should, before investing, refer to the Scheme Information Document and Statement of Additional Information available free of cost or access the same from the website www.zerodhafundhouse.com

The scheme particulars have been prepared in accordance with Securities and Exchange Board of India (Mutual Funds) Regulations, 1996, as amended till date, and filed with Securities and Exchange Board of India (SEBI). The units being offered for public subscription have not been approved or disapproved by SEBI, nor has SEBI certified the accuracy or adequacy of this KIM.

The Key Information Memorandum is dated May 29, 2025.

Investment Objective	<p>The investment objective of the scheme is to generate returns that are in line with the performance of physical silver in domestic prices, subject to tracking error.</p> <p>There is no assurance or guarantee that the investment objective of the scheme would be achieved</p>											
Asset Allocation Pattern of the Scheme	<p>Under the normal circumstances, the asset allocation (% of Net Assets) of Scheme's portfolio will be as follows:</p> <table border="1" data-bbox="459 842 1441 1227"> <thead> <tr> <th rowspan="2">Instruments</th> <th colspan="2">Indicative allocations (% of total assets)</th> </tr> <tr> <th>Minimum</th> <th>Maximum</th> </tr> </thead> <tbody> <tr> <td>Silver & Silver related instruments*</td> <td>95</td> <td>100</td> </tr> <tr> <td>Debt[^] and Money Market Instruments^{^^}, cash and cash equivalents.</td> <td>0</td> <td>5</td> </tr> </tbody> </table> <p><i>*Includes physical silver and other silver related instruments which may be permitted by SEBI from time to time. Exchange Traded Commodity Derivatives (ETCDs) having silver as the underlying shall be considered as 'silver related instrument' for Silver ETF. The Scheme may participate in ETCDs with silver as underlying, as exposure to derivatives of silver may be required in certain situations wherein it will be beneficial to the Scheme to invest in silver derivatives as compared to investing in physical silver or when it is not possible to invest in physical silver due various reasons.</i></p> <p><i>[^]including debt ETFs/units of Debt and Liquid Mutual Fund</i></p> <p><i>^{^^}Money Market instruments includes commercial papers, commercial bills, treasury bills, Tri-party repo, Government securities having an unexpired maturity up to one year, call or notice money, certificate of deposit, usance bills, and any other like instruments as specified by the Reserve Bank of India from time to time.</i></p> <p>The cash and cash equivalents* with residual maturity of less than 91 days may be treated as not creating any exposure.</p> <p><i>*SEBI vide letter dated November 03, 2021, has clarified that Cash Equivalent shall consist of Government Securities, T-Bills and Repo on Government Securities.</i></p>	Instruments	Indicative allocations (% of total assets)		Minimum	Maximum	Silver & Silver related instruments*	95	100	Debt [^] and Money Market Instruments ^{^^} , cash and cash equivalents.	0	5
Instruments	Indicative allocations (% of total assets)											
	Minimum	Maximum										
Silver & Silver related instruments*	95	100										
Debt [^] and Money Market Instruments ^{^^} , cash and cash equivalents.	0	5										

It may be noted that the margin placed for taking exposure to ETCDs are generally lower than the ETCD exposure limit considered for the purposes of monitoring investment limits and therefore, the residual cash (i.e. ETCD exposure less placement of margin towards participation in ETCDs) are placed in cash and cash equivalents in the interest of investors. The said placement in cash and cash equivalents shall not be considered as part of the limit of 0% to 5% allocated towards Debt & Money Market Instruments.

In terms of Paragraph 3.3.2.3 of SEBI Master Circular dated June 27, 2024, Investment in ETCDs having silver as the underlying by Silver ETFs will be subject to following conditions:

- The exposure to ETCDs having silver as the underlying shall not exceed 10% of net asset value of the scheme. However, the above limit of 10% shall not be applicable to Silver ETFs where the intention is to take delivery of the physical silver and not to roll over its position to next contract cycle.
- The Cumulative gross exposure of Silver ETFs shall not exceed 100% of the net assets of the Scheme, debt, money market instruments will not exceed 100% of the net assets of the scheme.
- The physical silver with fineness of 999 parts per thousand (or 99.9% purity) as defined under SEBI regulations.

The Scheme may also invest in other schemes managed by the AMC or in the schemes of any other Mutual Fund not more than 5% of the Net Asset Value of the Mutual Fund, provided it is in conformity with the investment objectives of the Scheme.

The Scheme does not intend to undertake/ invest/ engage in the following:

S.No.	Type of Instrument	Percentage of exposure	Circular references
1.	Securitized Debt		
2.	Short selling of securities		
3.	Repo in corporate debt		
4.	Unrated instruments (except TREPs/ Government Securities/ SDL / Repo in Government Securities);		
5.	Foreign securities/ADR/GDR		
6.	REITs and InvITs		

7.	AT1 and AT2 Bonds	The Scheme will not invest/engage in these instruments.
8.	Instruments having Special Features as defined in SEBI Circular no. SEBI/HO/IMD/DF4/CIR/P/20 21/032 dated March 10, 2021	
9.	Credit Enhancements & Structured Obligations	
10.	Credit Default Swap transactions	
11.	Overseas Securities	

Change in Asset Allocation:

The Scheme, out of the funds allocated shall primarily invest in Silver (includes physical Silver and other Silver related instruments which may be permitted by Regulator from time to time). Expectation is that, over a period of time, the tracking error of the Scheme relative to the performance of the Underlying Index Commodity will be relatively low. The Investment Manager would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimise tracking error to the maximum extent possible. Under normal market circumstances, such tracking error shall not exceed 2%. In case of unavoidable circumstances in the nature of force majeure, which are beyond the control of the AMCs, the tracking error may exceed 2% and the same shall be brought to the notice of Trustees with corrective actions taken by the AMC, if any.

The proportions mentioned in the asset allocation can vary substantially depending upon the perception of the fund manager; the intention being at all times to seek to protect the interests of the Unit holders. Such changes in the investment pattern will be for short term and for defensive considerations only and will be rebalanced within 7 calendar days. As per SEBI Circular No. SEBI/HO/IMD/DOF2/P/CIR/2022/69 dated May 23, 2022, in case of deviation (passive), the portfolio would be rebalanced within 7 calendar days from the date of deviation. The funds raised under the Scheme shall be invested only in securities as permitted by SEBI (Mutual Funds) Regulations, 1996. Provided further and subject to the above, any change in the asset allocation affecting the investment profile of the Scheme shall be effected only in accordance with the provisions of sub regulation (15A) of Regulation 18 of the SEBI (MF) Regulations.

Portfolio Rebalancing

	<p>Pursuant to SEBI circular no. SEBI/HO/IMD/IMD - II DOF3/P/CIR/2022/39 dated May 23, 2022 and circulars issued thereunder, in case of change in constituents of the index due to periodic review, the portfolio of the scheme will be rebalanced within 7 calendar days.</p> <p><u>Short term defensive consideration:</u></p> <p>Subject to SEBI circular no. SEBI/HO/IMD/DF2/CIR/P/2021/024 dated March 04, 2021 and circulars issued thereunder, the asset allocation pattern indicated above may change for a short term period on defensive considerations, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. These proportions may vary depending upon the perception of the Fund Manager, the intention being at all times to seek to protect the interests of the Unit holders. Such changes in the investment pattern will be rebalanced within 7 calendar days from the date of deviation and further action may be taken as specified under SEBI Circulars/ AMFI guidelines issued from time to time.</p>
Investment Strategy	<p>The Scheme is a passively managed ETF and the investment objective of the scheme is to generate returns that are in line with the performance of physical silver in domestic prices, subject to tracking error. The Scheme may invest in Silver and Silver related instruments (including derivatives) and intends to track the domestic prices of Physical Silver. Investment in Debt securities and money market instruments will be as per the limits in the asset allocation table of the Scheme, subject to permissible limits laid under SEBI (MF) Regulations. Investment in debt securities will be guided by credit quality, liquidity, interest rates and their outlook. The Scheme may also invest in the schemes of other Mutual Funds within the prescribed limits.</p> <p>Though every endeavor will be made to achieve the objective of the Scheme, the AMC/Sponsors/Trustee does not guarantee that the investment objective of the Scheme will be achieved. No guaranteed returns are being offered under the Scheme.</p>
Risk Profile of the scheme	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized at page no. 17 - 22.</p> <p>For details on risk factors and risk mitigation measures, please refer to the Scheme Information Document (SID).</p>
Plans and Options	<p>Currently, there are no plans/options available under the Scheme.</p> <p>The Trustees/ AMC reserves the right to introduce further Plan/ Options as and when deemed fit, subject to the SEBI (MF) Regulations.</p>

	For detailed disclosure on default plans and options, kindly refer to SAI.								
Applicable NAV	The NAV applicable for purchase or redemption or switching of Units based on the time of the Business Day on which the application is accepted, subject to the provisions of 'realisation of funds' and 'cut off timings' as described in the Scheme Information Document.								
Minimum Application Amount/ Number of Units	<table border="1"> <thead> <tr> <th>Purchase</th> <th>Additional Purchase</th> <th>Redemption</th> </tr> </thead> <tbody> <tr> <td> <p>On the Exchange:</p> <p>Investors may purchase the Units of the Scheme through the Stock Exchange(s) on which the units of the Scheme are listed, on any trading day in round lot of one (1) Unit and multiples thereof at the prevailing listed price.</p> <p>Directly with Mutual Fund:</p> <p>Only Market maker(s) and large investors subject to following:</p> <p><u>a. Risk Factors

Scheme Specific Risk Factors

The performance of the Scheme may be affected by changes in Government policies, general levels of interest rates and risks associated with trading volumes, liquidity and settlement systems, etc. Some of the Risks are listed below:

Risk associated with Scheme:

1. **Passive Management of Investments:** The Scheme shall follow a passive investment strategy. The scheme shall invest in Silver regardless of their investment merit. The scheme does not aim to take any defensive position in case of falling markets.
2. **Active Market:** Although the scheme is listed on exchanges, there can be no assurance that an active secondary market will be developed or maintained. The AMC and the Trustees will not be liable for delay in trading of Units on Stock Exchange due to the occurrence of any event beyond their control. For an investor in less than Creation Unit Size, exchange quotes may not be always available.
3. **Liquidity Risk:** Trading in units of the scheme on the Exchange may be halted because of market conditions or for reasons that, in view of the Exchange authorities or SEBI, trading in units of the scheme is not advisable. In addition, trading in units is subject to trading halts caused by extraordinary market volatility and pursuant to Stock Exchange(s) and SEBI "circuit filter" rules as applicable from time to time. There can be no assurance that the requirements of the exchange/s necessary to maintain the listing of units of the scheme will continue to be met or will remain unchanged.
4. **Redemption Risk:** The AMC will appoint Market Maker(s) (Aps)/ Market Makers (MMs) to provide liquidity for the units of Silver ETFs in the secondary market on an ongoing basis. The Market Maker(s) would offer daily two-way quotes (buy and sell quotes) in the market. Further, the price received upon redemption of units may be less than the value of the silver represented by them.
5. **Regulatory change:** Any changes in trading regulations by the Stock Exchange(s) or SEBI may affect the ability of market makers to arbitrage resulting in wider premium / discount to NAV. The Units of the Scheme may trade above or below their NAV. The NAV of the Scheme will fluctuate with changes in the market value of Scheme's holdings. The trading prices of Units of the Scheme will fluctuate in accordance with changes in their NAV as well as market supply and demand for the Units of the Scheme.
6. **Settlement:** The Units will be issued only in demat form through depositories. The records of the depository are final with respect to the number of Units available to the credit of the Unit holder. Settlement of trades, repurchase of Units by the Mutual Fund during liquidity window depends upon the confirmations to be received from depository(ies) on which the Mutual Fund has no control.

Risks associated with Silver/commodity

Global silver supplies and demand, which is influenced by factors such as forward selling by silver producers, purchases made by silver producers to unwind silver hedge positions. Productions and cost levels in major silver producing countries can also impact silver prices. Further, Central bank purchases and sales also impact the price of silver. The prices of Silver are also affected: -

- Macro-economic factors – Expected rate of inflation versus actual may impact the price of silver. Global or regional political, economic or financial events and situations of countries, changes in interest rates and perceived trends in bullion prices, exchange rates, inflation trends, market movements, etc. can also impact price and demand / supply.
- Mining & Production – Lower production could have a positive effect on silver prices. Conversely excessive production capacities would lead to a downward movement in silver prices as the supply goes up.
- Currency exchange rates – A weakening dollar may act in favour of silver prices and vice versa
- Changes in regulations or taxes or any other levies – Any changes in trading regulations by the stock exchange(s) or SEBI may affect the ability of Authorised Participant to arbitrage resulting into wider premium / discount to NAV. Any changes in the regulations relating to import and export of silver or silver jewellery (including customs duty, sales tax and any such other statutory levies) may affect the ability of the Scheme to buy / sell Silver against the purchase and redemption requests received. Any change in the rates of indirect taxation / applicable taxes would affect the valuation of the Scheme.
- Seasonal demand: Demand for Silver in India is closely tied to the production of jewellery which tends to increase ahead of festive seasons. Any factor impacting the seasonal demand will impact the prices of Silver
- Market Liquidity: There can be no assurance that the requirements of the market necessary to maintain the listing of Silver ETF will continue to be met or will remain unchanged. Silver ETF may suffer liquidity risk from domestic as well as international market
- Demand-Supply mismatch – To the extent that demand for Silver exceeds the available supply at that time, Authorized Participants may not be able to readily acquire sufficient amounts of Silver necessary for the creation of a Basket. Market speculation in Silver could result in increased requests for the issuances. It is possible that Authorized Participants may be unable to acquire sufficient Silver that is acceptable for delivery for the issuance of new Baskets due to a limited then-available supply coupled with a surge in demand for the ETF units. In such circumstances, the AMC may suspend or restrict the issuance of Baskets. Such occurrence may lead to further volatility in the price and deviations, which may be significant, in the market price of the ETF units relative to the NAV.
- Market volatility – The Silver market in general has experienced extreme price and volume fluctuations that have often been unrelated or disproportionate to factors such as Silver's uses in jewelry, technology, and industrial applications, or cost and production levels in major Silver producing countries.
- Indirect Taxation: For the valuation of Silver by the Scheme, indirect taxes like customs duty, VAT, etc. would also be considered. Hence, any change in the rates of indirect taxation / applicable taxes would affect the valuation of the Scheme.

Risks associated with handling, storing and safekeeping of physical silver:

All physical Silver procured must follow the guidelines as prescribed by SEBI. Risk arises when part or all of the Silver held by the Fund could be lost, stolen or damaged and access to Silver may be restricted due to natural calamities or human actions, loss or damage directly or indirectly occasioned by, happening through or in consequence of war, invasion, acts of foreign enemies, hostilities (whether war be declared or not), civil war, rebellion, revolution, insurrection, military or usurped power. Loss due to aridity, humidity, exposure to light or extremes of temperature. Hence, the Custodian maintains insurance in regard to the business on terms and conditions and the custodian is also responsible for all costs arising from the insurance policies. The custodian taking delivery on behalf of the AMC needs to ensure the weight, purity, and the source of Silver as specified under the guidelines issued by SEBI. Since this is paramount to the SEBI guidelines, the risk arises in violation of the same. Safekeeping of physical Silver requires appropriate vaulting space,

confirming to the best global standards. The vaulting agents engaged by the custodian need to ensure the same.

Risks Related to the Custody of Silver:

The Custodian is responsible for the safekeeping of the silver bullion and also facilitates the transfer of silver bullion into and out of the vault. The Custodian is a clearer and approved weigher under the rules as defined under SEBI regulations. Accordingly, the Scheme is dependent on the Custodian to comply with the best practices and to implement satisfactory internal controls for its silver bullion custody operations in order to keep the silver bullion secure.

The AMC does not insure its silver (Underlying silver of the scheme). The Custodian maintains insurance on such terms and conditions as it considers appropriate in connection with its custodial obligations under the Custodian Agreement and is responsible for all costs, fees and expenses arising from the insurance policy or policies. The AMC is not a beneficiary of any such insurance and does not have the ability to dictate the existence, nature or amount of coverage. Therefore, Unitholders cannot be assured that the Custodian maintains adequate insurance or any insurance with respect to the silver held by the Custodian on behalf of the Trust.

The AMC ensures that the physical Silver held under the scheme is adequately insured by the Custodian through various periodic disclosures and independent vault visits and audits.

Risks Factors Associated with Trading in the Secondary Market

Although Units of Scheme are listed on the Stock Exchange(s), there can be no assurance that an active secondary market will be developed or be maintained.

Trading in Units of the Scheme on the Stock Exchange(s) may be halted because of market conditions or for reasons that in view of the Exchange Authorities or SEBI, trading in Units of the Scheme is not advisable. In addition, trading in Units of the Scheme is subject to trading halts caused by extraordinary market volatility and pursuant to the Exchange and SEBI circuit filter rules. There can be no assurance that the requirements of the Stock Exchange(s) necessary to maintain the listing of Units of the Scheme will continue to be met or will remain unchanged.

Any changes in trading regulations by the Stock Exchange(s) or SEBI may affect the ability of market makers to arbitrage resulting in wider premium / discount to NAV.

The Units of the Scheme may trade above or below their NAV. The NAV of the Scheme will fluctuate with changes in the market value of Schemes holdings. The trading prices of Units of the Scheme will fluctuate in accordance with changes in their NAV as well as market supply and demand for the Units of the Scheme.

The Units will be issued only in demat form through depositories. The records of the depository are final with respect to the number of Units available to the credit of the Unit holder. Settlement of trades, repurchase of Units by the Mutual Fund during liquidity window depends upon the confirmations to be received from depository(ies) on which the Mutual Fund has no control.

The Scheme provides for the creation and redemption of Units in Creation Unit Size directly with the Fund and therefore, it is expected that large discounts or premiums to the NAV of the Units of the Scheme will not sustain due to arbitrage opportunities available.

Conversion of underlying physical silver into the Units of the Scheme may attract capital gain tax depending on acquisition cost and holding period.

Risk associated with investing in exchange traded commodity derivatives Commodity risks:

Volatility in the commodities markets may be caused by changes in overall market movements, domestic and foreign political and economic events and policies, war, acts of terrorism, changes in domestic or foreign interest rates and/or investor expectations concerning interest rates, domestic and foreign inflation rates, investment and trading activities of mutual funds, hedge funds and commodities funds, and factors such as drought, floods, weather, livestock disease, embargoes, tariffs and other regulatory developments, or supply and demand disruptions. Because the Fund's performance is linked to the performance of volatile commodities, investors should be willing to assume the risks of potentially significant fluctuations in the value of the Fund's shares. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of investment strategies depends upon the ability of the fund manager(s) to identify such opportunities which may not be available at all times. Identification and execution of the strategies to be pursued by the fund manager(s) involve uncertainty and the decision of the fund manager(s) may not always be profitable. No assurance can be given that the fund manager(s) will be able to identify or execute such strategies.

The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

Risks associated with Debt and Money Market Instruments or Fixed Income Securities

Debt and Money Market Instruments or Fixed Income Securities are subject to the risk of an issuer's inability to meet interest and principal payments on its obligations and market perception of the creditworthiness of the issuer.

Credit Risk: This is the risk associated with the issuer of a debenture/bond or a Money Market Instrument defaulting on coupon payments or in paying back the principal amount on maturity. Even when there is no default, the price of a security may change with expected changes in the credit rating of the issuer. It is to be noted here that a Government Security is a sovereign security and is the safest. Corporate bonds carry a higher amount of credit risk than Government Securities. Within corporate bonds also there are different levels of safety and a bond rated higher by a particular rating agency is safer than a bond rated lower by the same rating agency.

Interest Rate Risk: Fixed income securities such as government bonds, corporate bonds and Money Market Instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices depends upon the coupon and maturity of the security. It also depends upon the yield level at which the security is being traded.

Liquidity Risk: The Indian debt market is such that a large percentage of the total traded volumes on particular days might be concentrated in a few securities. Traded volumes for particular securities differ

significantly on a daily basis. Consequently, the scheme might have to incur a significant “impact cost” while transacting large volumes in a particular security.

Reinvestment Risk: Investments in fixed income securities carry reinvestment risk as interest rates prevailing on the coupon payment or maturity dates may differ from the original coupon of the bond.

Basis Risk: The underlying benchmark of a floating rate security or a swap might become less active or may cease to exist and thus may not be able to capture the exact interest rate movements, leading to loss of value of the portfolio.

Spread Risk: In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. During the tenure of the security this spread may move adversely leading to loss in value of the portfolio. The yield of the underlying benchmark might not change, but the spread of the security over the underlying benchmark might increase leading to loss in value of the security.

Risk of Rating Migration: It may be noted that the price of a rated security would be impacted with the change in rating and hence, there is risk associated with such migration.

Counterparty and Settlement Risk: Corporate Bond Repo will be settled between two counterparties in the OTC segment unlike in the case of TREPS transactions where CCIL stands as central counterparty on all transactions (no settlement risk). Settlement risk in reverse repo will be mitigated by requiring the counterparty (entity borrowing funds from the Mutual Fund) to deliver the defined collateral in the account of the MF before the cash is lent to the counterparty. Further, the Mutual Fund will also have a limited universe of counterparties comprising of Scheduled Commercial Banks, Primary Dealers, Mutual Funds and National Financial Institutions.

Legislative Risk: Changes in government policy in general and changes in tax benefits applicable to Mutual Funds may impact the returns to investors in the scheme.

Risk of Rating Migration: It may be noted that the price of a rated security would be impacted with the change in rating and hence, there is risk associated with such migration.

Risk factors associated with processing of transactions through Stock Exchange Mechanism

The trading mechanism introduced by the Stock Exchange(s) is configured to accept and process transactions for mutual fund Units in both Physical and Demat Form. The allotment and/or redemption of Units through NSE and/or BSE or any other authorized Stock Exchange(s), on any Business Day will depend upon the modalities of processing viz. collection of application form, order processing /settlement, etc. upon which the Fund has no control. Moreover, transactions conducted through the Stock Exchange mechanism shall be governed by the operating guidelines and directives issued by respective recognized Stock Exchange(s). Accordingly, there could be negative impacts to the investors such as delay or failure in allotment / redemption of units. The Fund and the AMC are not responsible for the negative impacts.

Risks associated with segregated portfolio

The unit holders may note that no redemption and subscription shall be allowed in the segregated portfolio. However, in order to facilitate exit to unit holders in the segregated portfolio, the AMC shall enable listing of units of segregated portfolio on the recognized stock exchange.

The risks associated in regard to the segregated portfolio are as follows:

- The investors holding units of the segregated portfolio may not be able to liquidate their holdings till the time of recovery of money from the issuer.
- The security comprising the segregated portfolio may not realize any value.
- Listing units of the segregated portfolio on a recognized stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units of the segregated portfolio on the stock exchange.
- The trading price of units on the stock exchange may be significantly lower than the prevailing Net Asset Value (NAV) of the segregated portfolio.

Tracking Error & Tracking Difference Risk

Tracking error is defined as the standard deviation of the difference between the daily returns of the Underlying Index and NAV of the Scheme, this may happen due to certain factors such as the fees and expenses of the Scheme, corporate actions, cash balance, changes to the underlying index, regulatory restrictions and lack of liquidity. Hence it may affect Schemes ability to achieve close correlation with the underlying index of the Scheme. The Schemes returns may therefore deviate from its underlying index.

The Fund Manager would monitor the Tracking Error of the Scheme on an ongoing basis and would seek to minimize the Tracking Error to the maximum extent possible. The tracking error of the scheme based on past one year rolling data shall not exceed 2%. In case of unavoidable circumstances in the nature of force majeure, which are beyond the control of the AMCs/ Mutual Fund, the tracking error may exceed 2% and the same shall be brought to the notice of Trustees with corrective actions taken by the AMC, if any. The Scheme will disclose the tracking error based on past one year rolling data, on a daily basis, on the website of AMC and AMFI. In case the Scheme has been in existence for a period of less than one year, the annualized standard deviation shall be calculated based on available data. There can be no assurance or guarantee that the scheme will achieve any particular level of tracking error relative to performance of the Underlying Index.
